

Evidence-Guided Collaborative Intrusion Detection

Academic Research Proposal · Version 1

Evidence-Guided Collaborative Intrusion Detection

Abstract

Evidence-led proposal.

Problem Statement

A reproducible framework is required.

Main Research Gap

Evaluation lacks deployment realism.

Research Objectives

- Build a baseline.
- Evaluate the method.

Proposed Methodology

A controlled comparative study will use fixed datasets and documented metrics.

Work Plan and Timeline

- Months 1-2: design.
- Months 3-5: experiments.
- Month 6: reporting.

Evidence Traceability

Claims map to retained papers.
